

CALCIUM ALUMINATES

Proceedings of the International Conference 2014

Edited by Charles Fentiman, Raman Mangabhai and Karen Scrivener

CALCIUM ALUMINATES

Proceedings of the International Conference 2014

CALCIUM ALUMINATES

Proceedings of the International Conference 2014

Palais des Papes, Avignon, France, 18-21 May 2014

Principal Supporter

Kerneos Aluminate Technologies

Co-supporters

Calucem, Cementos Molins, Çimsa Cement and Górká Cement

Meeting Organised by Cement and Concrete Science

Edited by C. H. Fentiman, R. J. Managbhai and K. L. Scrivener

CONTENTS

Preface	v
Organising Committee, Scientific Advisory and Scientific Review Panel	vii
PART ONE – INTRODUCTION	1
1 Environmental footprint of Calcium Aluminate Cements (CAC) E. Henry-Lanier, B. Espinosa and C. Eychenne-Baron	3
2 Quantitative and Qualitative analysis of CAC and its hydrate products S. Ng and T. Hjellström	17
PART TWO – CALCIUM ALUMINATES AND THEIR HYDRATION	31
3 Mineral composition and hydration of a $C_{12}A_7$ rich binder B. Touzo and P. A. Andreani	33
4 Ultra fast hydration opening new application fields: a comparison of different calcium Aluminate technologies	42
5 Kinetics of CA and CA ₂ dissolution determined by QXRD and corresponding enthalpies of Reactions F. Goetz-Neunhoeffler, S. R. Klaus and J. Neubauer	54
6 Application of heat flow calculation to synthetic calcium aluminate cement mixes S. R. Klaus, J. Neubauer, F. Goetz-Neunhoeffler, A. Buhr and D. Schmidtmeier	65
7 Crystal structures and XRD data of new calcium aluminate cement hydrates H. Pöllmann, R. Kaden and S. Stöber	75
PART THREE – RELATED PHASES AND THEIR STRUCTURES	87
8 Synthesis and crystal chemistry of strontium aluminates H. Pöllmann, S. Stöber, P. Mohr and R. Kaden	89
9 Mono-(strontium-, calcium-) aluminate based cements H. Pöllmann and R. Kaden	
10 Synthesis and crystal chemistry of manganese containing perovskites: phases with Perovskite structures S. Stöber, H. Pöllmann, G. Redhammer and S. Schorr	109
11 Hydraulic phases in the system BaO – Al ₂ O ₃ R. Kaden and H. Pöllmann	120
12 Hydration and properties of calcium magnesium aluminate cement J. M. Auvray, H. Fryda, C. Zetterstrom, C. Wöhrmeyer and C. Parr	130
13 Investigation on the hydratable compounds in the CaO-Al ₂ O ₃ -ZrO ₂ system D. Madej, J. Szczerba and W. Kagan	140

PART FOUR – BLENDED CEMENT SYSTEMS	151
14 Thermodynamic modelling of effect of time and silica on the conversion process B. Lothenbach	153
15 Hydration study of a calcium aluminate cement blended with anhydrite G. Le Saout, B. Lothenbach, F. Winnefield, P. Taquet and H. Fryda	165
16 Impact of different calcium sulphate sources on the early hydration of two different Grades of calcium aluminate cements	177
17 Hydration of calcium aluminate cement based systems with calcium sulfate and limestone J. Bizzozero and K. L. Scrivener	187
18 Impact of different calcium sulfate sources on early hydration of two different grades Of calcium aluminate cement C. Stabler, C. Breunig, F. Goetz-Neunhoeffler, J. Neubauer, H. Fryda and R. Kwasny-Echterhagen	177
19 Parametric study of binary and ternary ettringite-based systems I. Martin, C. Patapy and M. Cyr	210
20 Course of Hydration of ferrite phase in a ternary binder model mix J. Neubauer, D. Ectors and F. Goetz-Neunhoeffler	222
21 Hydration and microstructure of rapid-strength binders based on OPC accelerated by early ettringite formation J. Bizzozero and K. L. Scrivener	231
22 Long-term hydration and mechanical behaviour of Portland cement, calcium aluminate cement and calcium sulfate blends	242
PART FIVE – VOLUME STABILITY	251
23 Ultra high early strength shotcrete: new binder composition approach J.-D. Lemay, M. Jolin and R. Gagné	253
24 Effect of temperature on length change of cementitious material using Portland cement- Calcium aluminate cement – anhydrite – blast furnace slag system H. Mori, E. Maruya, A. Sasaki and T. Takahashi	265
25 Volume stability of CAC-CaSO ₄ -CaCO ₃ -H ₂ O systems during drying L. Baquerizo, T. Matschei and K. L. Scrivener	274
26 Expansion mechanisms in ettringite systems J. Bizzozero, C. Gosselin and K. L. Scrivener	284
27 Volume stability of calcium aluminate cement and calcium sulfoaluminate cement systems M. P. Adams and J. H. Ideker	295
PART SIX – ADMIXTURES	307
28 Rheology of calcium aluminate cement based concrete: controlling the “pot life” M. Jolin, J.-D. Lemay, B. Bissonnette and É. Crépault	309
29 A new setting accelerator upon lithium sulfate technology for calcium aluminates based materials J. Estival, J. Mahiaoui, V. Watt, P. Taquet and J. F. Colombet	321

30	Polycarboxylate ether based superplasticiser for calcium aluminate cement mortars N. Ukrainczyk, J. Sipusic and N. Vrbos	333
31	Effect of PCE admixtures on fluidity, hydration and microstructure of calcium aluminate Cement pastes M. M. Alonso, F. Puertas and M. Palacios	341
32	Formation of organo-mineral phases in calcium aluminate cement involving Polycarboxylate superplasticizers O. Storcheva, S. Ng, J. Plank, I. Dekany, E. Metwalli and P. Müller-Buschbaum	352
33	The influence of mineralogical composition of high alumina cement on its physical – Mechanical properties C. Stancu, N. Angelescu and M. Muntean	364
34	Action mechanism of admixtures in ettringite systems J. Pommay, H. Fryda, F. Bordet and D. Tournakis	371
35	Latex-modified calcium aluminate cement A. F. Bentivegna, J. H. Ideker and K. J. Folliard	383
36	Alkaline earth glycolates and their application as CAC admixtures R. Kaden and H. Pöllmann	396
PART SEVEN – AGEING OF FORMULATIONS		405
37	Ageing behaviour of SLU mortar formulations based on a ternary binder system Comprising OPC/CAC/AH exposed to elevated moisture and atmospheric CO ₂ J. Plank, E. dubina and M. R. Meier	407
38	Ageing of cement and drymix: consequences and solutions J. Mahiaoui, J. Estival and H. Fryda	422
PART EIGHT – CALCIUM ALUMINATE CEMENTS IN REFRACTORY APPLICATIONS		435
39	Testing of calcium aluminate cement bonded castables and influence of curing conditions on the strength development A. Buhr, D. Schmidtmeier, G. Wams, S. Kuiper and S. Klaus	437
40	Mixing optimization of an alumina based LC-castable by applying variable power inputs J. Kasper and O. Krause	450
PART NINE – CALCIUM ALUMINATE CEMENT IN WIDE RANGING APPLICATIONS		457
41	Influence of sulfate on physical properties of quick-hardening cement compounds H. Hara, T. Higuchi, M. Morioka, T. Hurnaus, J. Plank and E. Sakai	459
42	Push-out bond strength of a new calcium aluminate cement (endobinder) R. C. Morais, L. F. R. Garcia, F. C. P. Pires-de-Souza and H. L. Rossetto	470
43	The use of calcium aluminate cement in terrazzo type floor tiles T. Delibaş, Ö. Kirca and İ. Ö. Yaman	479
44	Durability of rapid-strength concrete produced with ettringite-based binders E. G. Moffatt and M. D. A. Thomas	488

45	Calcium aluminate cement application in lime binders proposed for architecture restoration A. Defus	498
PART TEN – DURABILITY		509
46	Development of an accelerated test of fungal biodeterioration: application to calcium aluminate cements A. Govin, I. Albuquerque and P. Grosseau	511
47	Influence of the chemical composition of mortars on algal biofouling E. Dalod, A. Govin, R. Guyonnet, P. Grosseau, C. Lors and D. Dabidot	523
48	Mineralogy of a 90 year old structure “le tunnel des Valois” F. Sorrentino and D. Damidot	535
49	10 year exposure of CAC concrete in an aggressive marine environment P. F. G. Banfill	545
50	The performance of CAC concrete in an aggressive marine environment H. Yi and M. D. a. Thomas	556
PART ELEVEN – DURABILITY IN BIOGENIC APPLICATIONS		571
51	Performance of various concretes in the Virginia experimental sewer over 20 years A. M. Goynes and M. G. Alexander	573
52	The impact of calcium aluminate cement and aggregates on conversion and on field performance in sewers M. Valix, A. W. H. Cheung, J. Sunarho and H. Bustamante	585
53	The influence of water/powder ration on the resistance to sulfuric acid on hardened Calcium aluminate cement containing blast furnace slag T. Sugiyama, K. Tabara, M. Morioka and E. Sakai	600
54	Acid resistance of calcium aluminate cement concrete blended with supplementary Cementitious materials for application in sewer pipes N. Motsiolo, M. G. Alexander and H. Beushausen	608
55	A new method for evaluation of cement-based material resistance against biogenic attacks In sewer-like environments: comparison between CAC and BFSC linings M. Peyre Lavigne, J. N. Foussard, A. Cockx, E. Paul, A. Bertron and G. Escadeillas	621
56	Biogenic corrosion mechanism : study of parameters explaining calcium aluminate cement durability J. Herisson, E. D. van Hullebusch, M. Guéguen-Minerbe and T. Chaussadent	633
57	Development of a reproducible, representative and accelerated biogenic corrosion test to deliver durable structures in sewer networks J. Herisson, M. Guéguen-Minerbe, T. Chaussadent and E. D. van Hullebusch	645
	Author Index	659
	Subject Index	661
