

Cambridge 2020

We are delighted to
announce the next
International Conference on
Calcium Aluminates

1st to 3rd of June 2020

All details are on the dedicated website:

5th International Conference on

Calcium Aluminates

www.cacements.com

This will be the fifth in a series of meetings dedicated to the science of this widely used special cement. The meeting will deal with various aspects of this topic covering recent developments, emerging technologies and environmental impact related to the following themes:

- ❖ Manufacture
- ❖ Mineralogy of CAC
- ❖ Microstructure and Hydration Studies
- ❖ Fresh Properties
- ❖ Mechanical Properties
- ❖ Admixtures
- ❖ Durability
- ❖ Blended Systems
- ❖ Applications
- ❖ Future Trends

Authors are encouraged to contact us as soon as possible. As previously a book of Proceedings will be prepared with the papers presented.

So far we have received 72 abstracts and most manuscripts have been supplied and are being reviewed and finalized for inclusion in the Proceedings. We will soon be able to add detail to the conference programme which will include a wide range of subjects such as, new types of Calcium Aluminates and related cements, hydration studies, papers on blended cements and formulations, durability aspects, including for biogenic applications. As at previous ICCA's we will make sure that delegates have plenty of opportunity for networking, and discussing their work.

...REGISTRATION IS OPEN...

To register your interest or ask questions about this meeting please contact, charlesfentiman@aol.com or +44 (0)1403 732186

The Venue

The Wellcome Genome Campus Conference Centre was purpose-built alongside a Grade II listed country house, Hinxton Hall. Set in over 100 acres of parkland on the banks of the River Cam it has been an integral part of the campus for the last 17 years. The conference facilities have recently undergone a major refurbishment programme to both improve the facilities with a very comfortable state of the art auditorium and exhibition space all set in beautiful parklands. There is high quality accommodation on site as well as delegates being able to take advantage of a good selection of hotels in Cambridge town centre. Shuttle busses will be arranged for delegates to travel to and from the town centre in the mornings and evenings.

Social Program

An important aspect of the previous conferences on Calcium Aluminates has been a social program that provides plenty of informal time for delegates to be able to get to know each other and to enjoy the local area and this will be the same in Cambridge. A gala dinner will be held at Duxford aircraft museum, under the wing of Concord and a walking tour of Cambridge City centre on the Monday evening. For accompanying persons (as well as for delegates wanting to take time out) there will be daily tours available to nearby places of interest.
